

## Matrix for LEED Credit Contributions

Developed by the US Green Building Council (USGBC), Leadership in Energy and Environmental Design (LEED) provides building owners and operators a concise framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

The matrix below identifies the wood doors (Veneered and laminated faces) that qualify for credits for a specific project. All LEED projects must be specified when submitting a quote request or a purchase order to ensure that you obtain the necessary contributions from the doors. Please feel free to contact us with any questions or if you need additional information. 1-800-999-3667

All Vancouver Door products are in compliance with California Air Resource Board (CARB) Phase 2 requirements.
